

Quantum / 09:30 to 10:00

Visit Q'Strait to see the transportation industry's first fully automatic rear-facing wheelchair securement station, the Quantum. Combining transportation insight, intelligent technology and high quality construction, Quantum lets wheelchair and scooter passengers board the bus or train, position their chair and simply push a button to secure themselves in a stable and safe rear-facing position. All in under 25 seconds — without requiring the driver to leave their seat to help.

Bringing industry 4.0 to Wheel Assembly / 10:30 to 11:00

The world is changing. In the manufacturing world, companies are implementing Industry 4.0 to improve the quality of the products they produce. In the transit world, we now have the opportunity to use these Industry 4.0 concepts to make sure every wheel on every vehicle is assembled correctly and safely. Join us for a presentation on what Industry 4.0 is and how it can be implemented in transit maintenance operations to improve quality!

Evaluating the talent driving your fleet / 11:30 to 12:00

Join the DriveABLE team for this showcase event where they will be sharing on how they support transit fleets across North America with predictive cognitive tools that empower management with information to proactively respond to establish driver risk.

Mobileye Shield + system / 13:45 to 14:15

Mobileye Shield+ is the most advanced collision avoidance system available on the market for buses, trucks and commercial vehicles; it can be retrofitted to any vehicle. Mobileye Shield+ connects with a telematics system to capture and aggregate real-time alert data which helps identify hazardous road locations and infrastructure deficiencies. This critical safety information enables urban planners and public transit organizers to accurately identify infrastructure factors contributing to collisions. We look forward to presenting this cutting-edge safety technology with you at the Showcase Theatre
