

The Mobility Plus Worksop and Tour: Sponsored by RouteMatch

Join York Region Transit's specialized transit service, Mobility Plus for the day as they demonstrate how to support a seamless, multimodal transportation network, that encourages healthy and active travel. Adding to the success of using conventional services (Family of Services), for all or part of a specialized transit trip, Mobility Plus is now looking at opportunities to use specialized transit vehicles (On-Demand Strategy) for those residents whose travel demands may not be well served by traditional, conventional transit services.

Workshop Highlights:

- Application process to determine eligibility for Mobility Plus
- Family of Services travel training session with a contracted medical professional
- Travel Training assessments and creating individual passenger profiles
- Touring the custom built Transit Travel Training Centre
- Booking specialized and on-demand trips using a mobile app
- Payment options (smart card and mobile app)
- Scheduling trips for both conventional and specialized services (commingling)
- Moving forward to a fully on-demand, same day service, for all passengers
- Performance Based Contracts
- Incorporating third part transit providers

This workshop and tour will take place at the state-of-the-art York Region Transit Operations, Maintenance and Storage facility.

Sign up onsite at the Tour Desk, located across from the CUTA Registration Desk
